

## K-5 Teacher Scholarship for ChemEd 2019

We are excited to have a K-8 theme for presentations and special K-5 day at ChemEd this summer! ChemEd has been a conference for chemistry educators since 1973. While most would recognize high school chemistry teachers and college chemistry professors as "chemistry educators," we know that a student's passion for science must be sparked at an early age. The earlier that a child can experience the wonders of science, have their inquisitive nature fostered, and gain experience testing hypotheses, the better. Elementary school teachers are extremely important as they are tasked with instilling a passion for learning amongst ALL subjects! Therefore, elementary school teachers ARE chemistry teachers and we want you to attend ChemEd 2019!

Toward this goal, we are offering a \$120 scholarship toward your registration. This can be put towards Monday (one day) registration OR full conference registration. This scholarship brings the cost of registration down to \$20 or \$180 (if by April 15<sup>th</sup>) respectively. **Submit via email to Conference@ChemEd2019.com** or by mail to Paul Brandt **by June 1**<sup>st</sup>, **2019**. Please see more details at www.ChemEd2019.com

Name:	Grade Currently Teaching:
